

Are you offering CPD training for veterinarians?

Would you like European Accreditation for your programme?

***VETCEE is a European-wide Accreditation Scheme
for post-graduate modular programmes for veterinarians***

***First
programmes
were
accredited in
2013.***

***Their
graduates
share today
their
experience.***

- ✓ *Truly fantastic experience that has developed my skills professionally, and opened up the opportunities to improve my patient care and job satisfaction.*
- ✓ *Generally very well organised and all the practical days in particular were excellent. I know it is difficult, but more practical sessions always help.*
- ✓ *I would recommend it to anyone who wants to complete a certificate while still working in a busy small animal practice.*

- ✓ *I have acquired thorough understanding of certain subjects which I have been capable of using in my everyday life.*
- ✓ *I have been given the opportunity to update myself in a relatively easy and manageable way.*
- ✓ *It is not just knowledge and skills but also how you do a better job, it is to improve the diagnostic process, to prevent you from making mistakes and jump to conclusions*

VETCEE currently evaluates programmes in:

- ***Companion Animal Medicine***
- ***Porcine Health Management***
- ***Equine Practice***
- ***Bovine Health and Production***
- ***Laboratory Animal and Science***
