FVE WEBINAR

SUSTAINABLE FOOD SYSTEMS: INNOVATION, TECHNOLOGY AND ROLE OF THE VETERINARIAN

MEET THE SPEAKERS

[MAURIZIO FERRI](#)

Official veterinarian, chairman of the FVE food safety & sustainability working group. He represents FVE at the EFSA Stakeholders Advisory Group on Emerging Risks and in the EU Commission expert group on the European Food Security Crisis Preparedness and Response Mechanism. Maurizio is a specialist in food of animal origin inspection & auditing and physiopathology of animal reproduction. He focuses on veterinary public health, animal welfare, sustainable food systems and education.

[GLORIA LUZZANI](#)

She is currently PhD researcher at the Center for Corporate Responsibility and Sustainability (CCRS) at the University of Zurich and in charge of learning & development for the MSc in Food & Beverage at Cattolica University in Piacenza (IT). She holds a MSc in agriculture and food economics from the University of Piacenza (IT) and a PhD in agri-food systems. Her research focuses on indicators, tools and best practices for implementing and strengthening the sustainability of the food chain.

[DAVID BLACK](#)

Farm animal veterinarian holding a diploma in Bovine Reproduction, he is a specialist in cattle health and production. He leads “Paragon” a 20+ vet mixed veterinary practice in Cumbria (UK), committed and passionate about remaining a vet-led and independent business. Having a particular interest in cattle breeding and fertility, including advanced breeding technologies, he recently co-founded VetSalus, an organization that seeks to develop global veterinary collaboration, consultancy and training.

[NILS GRABOWSKI](#)

Veterinarian, Head of the Department of Hygiene & Technology of Productive Insects at the University of Veterinary Medicine in Hannover (DE), leader of the IFNEXT project and member of the FVE insects task force. His research focuses mainly on entomophagy, edible insects’ microbiology, insect processing and regulatory affairs feed safety and good feeding practices. He is also a specialist in dairy products safety and hygiene.

[CARLOS PINEIRO](#)

Veterinarian focusing on livestock health and production. He spends his time setting livestock information systems, and digitalization of livestock production through big data and predictive analytics management, health and production monitoring by integrating different kinds of data on-farm biosecurity, reproduction, health, abattoir, feeding equipment, environmental sensors, etc. He also provides education and training on data management.

CHAIRMAN & MODERATORS

FRANCESCO PROSCIA

FVE senior policy officer since 2010, he is a specialist in food safety and quality and food chain legislation. He holds a veterinary degree and a MSc in food safety & quality from the University of Parma (IT). Keen interested in global livestock health, preventative medicine and risk communication, he mainly focuses on food chain standards and legislation, international policy on veterinary public health, sustainable food systems and smart livestock production, EU Internal market & professionals' mobility, veterinary services and IT & communication.

ANNA CIEĆKIEWICZ

Anna is in her 5th year of study at the University of Agriculture in Kraków (PL) and the current President of the International Veterinary Students' Association (IVSA). Her professional interests focus on the prevention and control of infectious diseases, public health and veterinary policy. As an active member of IVSA, she is advocating for meaningful youth involvement, One Health approach and veterinary education that can properly prepare students for animal and public health challenges that we face every day.

WIEBKE JANSEN

Wiebke is an FVE policy officer and holds a veterinary degree from the Hannover University of Veterinary Medicine (DE) and a PhD in veterinary public health from the University of Namur (BE). She has worked and researched pre - and post-harvest food safety-related issues. In 2017 she became an EBVS specialist in veterinary public health. From 2019 to 2021 she worked for the Belgian Federal Institute for Public Health - Sciensano - as a laboratory manager and animal welfare officer. She joined FVE in 2021.
